

Thiago Oliveira Rocha

Quality Analyst - QA

thiago8rocha@gmail.com | linkedin.com/in/thiago8rocha | <https://github.com/thiago8rocha>

Professional Summary

Senior QA Analyst with over 9 years of experience in software quality, ISTQB CTFL (Foundation Level) certified, working on web, mobile and backend applications in agile environments. Experience in large-scale and internationally critical projects, including products for brands such as BMW, MINI, Toyota and Rolls-Royce (US and Canada).

Professional Experience

Zallpy – Florianopolis, SC (Remote)

Senior QA Analyst | April 2026 – Present

Allocated to CarBigData, a national leader in automotive data intelligence, working on fraud prevention and asset recovery through a proprietary data and image collection and analysis pipeline.

- Defined and implemented the project's test automation architecture from the ground up using Playwright, adopting the Feature Actions and Playwright BDD patterns, with coverage across API, BFF, Frontend, and Visual (UI) testing.
- Developed the automated test trigger and execution pipeline in Jenkins, using shared libraries and Google Chat integration for notifications.
- Contributed to defining Xray as the team's test management tool, with planned participation in its rollout alongside the project.

Zallpy – Florianopolis, SC (Remote)

Senior QA Analyst | September 2022 – April 2026

Allocated to the BMW US project, ensuring quality of MyGarage web and mobile applications for BMW, MINI, Toyota and Rolls Royce brands, covering versions for the United States and Canada.

- Structured the folder architecture and defined standards for creating test scripts in Xray, establishing formal documentation processes. This standardization resulted in structured test plans for regression testing, increasing result reliability and establishing systematic execution records.
- Standardized defect creation and documentation processes, facilitating traceability and control of what was reported, improving communication with developers.
- Executed accessibility tests using Axe Expert, ensuring compliance with Americans with Disabilities Act (ADA) standards.
- Performed risk and impact analysis of critical features, providing support for prioritization of fixes and releases.
- Actively participated in handoff and refinement ceremonies with developers and POs, ensuring technical alignment and reducing rework.
- Executed exploratory, regression, functional and black-box tests on web applications using BrowserStack for cross-browser validation and mobile responsiveness.

Locaweb – São Paulo, SP (Remoto)

Quality Analyst II | April 2022 – September 2022

- Allocated to multiple project teams at Wake Experience, an e-commerce platform serving thousands of online store owners.
- Defined and implemented automation architecture using Robot Framework, reducing regression test execution time and increasing automated test coverage across different projects.
- Led standardization of QA processes across teams, creating documentation that improved testing consistency and facilitated onboarding of new QAs.
- Performed risk and impact analysis of critical features, providing support for prioritization of fixes and releases, minimizing production incidents.
- Actively participated in handoff and refinement ceremonies with developers and POs, ensuring technical alignment.
- Created test data mass via frontend and database scripts for validation of complex scenarios.
- Performed REST API and backend validation using Postman and Swagger.
- Executed exploratory, regression, functional and black-box tests on multiple products.

Softplan – Florianópolis, SC

Quality Assurance Analyst II | April 2021 – April 2022

Quality Assurance Analyst I | December 2018 – April 2021

Allocated to the Justice Unit (UNJ), responsible for maintaining first and second degree systems used by courts throughout Brazil.

- Ensured stability and reliability of complex legacy systems through black-box, exploratory and regression testing.
- Reported and helped prioritize defects via RTC (Rational Team Concert), collaborating with developers to accelerate defect fixes.
- Created data mass via front-end and database (SQL Server, DB2 and Oracle).
- Proposed improvements to processes and features that were implemented in the products.
- Promoted from Analyst I to Analyst II in April 2021 for consistent performance and significant contributions.
- Executed exploratory, regression, functional and black-box tests.

BRISA – Sociedade para o Desenvolvimento da Tecnologia da Informação

Salvador, BA

QA Analyst – Team Leader | August 2018 – November 2018

QA team leadership on mobile testing project for LG mobile devices.

- Coordinated QA team, promoting continuous training and technical development of QAs, in addition to conducting individual performance monitoring.
- Supervised multiple short-term subprojects, adjusting scope, timeline and resources to ensure on-schedule deliveries.

- Planned and executed testing strategies including black-box, exploratory and performance testing to ensure product quality.

QA Analyst | March 2017 – August 2018

QA focused on testing LG mobile devices.

- Executed black-box, exploratory and performance tests on mobile devices, validating critical functionalities (calls, SMS, camera).
- Validated integration of embedded applications and main operating system functions.
- Identified and documented critical defects via HP Quality Center.
- Promoted to Team Leader after 18 months, recognizing technical capability and leadership skills.

Education

Bachelor's Degree in Information Systems

Unifacs – Salvador University | Salvador, BA | Completed in 2016

Certifications and Courses

- ISTQB CTFL – Certified Tester Foundation Level
- Udemy - Test Automation with Robot Framework - WEB+API Basics
- Udemy - Test Automation with Capybara, Cucumber and Ruby

Technical Skills

Testing and Quality

- Manual Testing: Front-end, Back-end, Mobile, APIs
- Test Automation: Robot Framework
- Test Types: Exploratory, Regression, Functional, Black-box, Performance, Load

Databases

- MySQL, Oracle, DB2, SQL Server, MongoDB

Tools

- Jira, RTC (Rational Team Concert), HP Quality Center, Mantis Bug Tracker

Methodologies

- Scrum, Kanban, Agile Methodologies
- Risk and Impact Management
- Continuous Process Improvement
- Requirements Analysis

Languages

- English: Advanced
